The following is an examiner's statement of reasons for allowance:

While Ostby teaches computer controlled machine tool which typically includes a numerically controlled machine tool controlled remotely by a remote control unit, wherein a front panel controller, that includes a microprocessor, controls the operation of display in accordance with command from the central processing unit.

And, Yarita teaches a system for controlling a loom wherein the loom and replacing apparatus operate independently of the networks of the host computer and each personal computer.

And, Bieber teaches a control program wherein a plurality of parallel instances of the control program are deployed to a respective plurality of thin client terminals over a network, and a process is independently controlled from each terminal.

Application/Control Number: 10/774,056

Art Unit: 2125

None of these references, taken alone or in obvious combination teach a device for controlling a plurality of machine tools or production machines having all the claimed features of applicant's instant invention, specifically including: a handheld device including the control software for controlling movement of the machine axes, wherein for each of the plurality of machine tools or production machines there exists in the control software a control function program, wherein the machine axes movements of each machine tool or production machine are controlled separately by a corresponding one of the control function programs. It is for these reasons that applicant's invention defines over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
